

Saltillo South Engine Plant Awarded Bronze Designation in World Class Manufacturing

- Saltillo South Engine Plant becomes the third FCA Mexico plant to achieve World Class Manufacturing milestone
- WCM implementation has saved the Company more than \$1 billion since June 2009

July 21, 2015, Mexico City - The FCA México Saltillo South Engine Plant (SSEP), located in Coahuila, Mexico, has been awarded bronze status for its results in implementing World Class Manufacturing (WCM), becoming the third facility in the country and the 10th in North America to achieve this milestone.

SSEP received the bronze designation five years after adopting the WCM operating system. The plant assembles the award-winning 3.6-liter Pentastar V-6 engine, which is available in the Dodge Journey, Dodge Charger, Dodge Challenger, Dodge Durango, Jeep® Grand Cherokee and Chrysler Town & Country.

"Our customers' satisfaction is due to the effort, commitment and motivation of the people who work at Saltillo Engine, which has been recognized in World Class Manufacturing, joining the Toluca Assembly Complex and Saltillo Truck Assembly Plant," said Jorge Luis Lares, Vice President - Manufacturing, FCA México. "We will continue assembling products with the highest quality standards and keep working toward the best way to fulfill our clients' needs."

World Class Manufacturing is a methodology that focuses on eliminating waste, increasing productivity, and improving quality and safety in a systematic and organized way. WCM engages the workforce to provide and implement suggestions on how to improve their jobs and their plants. WCM was first implemented by Fiat in 2006 and introduced to Chrysler Group as part of the alliance between the two companies in June 2009. Since that time, the Company has saved more than \$1.0 billion in controllable manufacturing costs as a result of the implementation of WCM.

In addition to SSEP, there are currently seven facilities that hold the WCM bronze designation. They are Toledo Assembly Complex (Ohio), Saltillo Truck Assembly Plant (Mex.), Trenton Engine Complex (Mich.), Warren Stamping (Mich.), Indiana Transmission Plant II (Ind.), Kokomo Transmission Plant (Ind.) and Toluca Assembly Plant (Mex.). Two FCA US facilities have earned silver rankings - Windsor Assembly (Ont.) and Dundee Engine (Mich.).

About FCA México

FCA México, S.A. de C.V. is a Mexican automaker with a new name and a long history. Headquartered in Santa Fe, FCA México is a member of the Fiat Chrysler Automobiles N.V. (FCA) family of companies. FCA México manufactures and sells vehicles under the Alfa Romeo, Chrysler, Dodge, Fiat, Jeep®, Mopar, Ram, SRT and Mitsubishi brands. FCA México is building upon the historic foundations of Chrysler, the innovative American automaker first established by Walter P. Chrysler in 1925, and Fiat, founded in Italy in 1899 by pioneering entrepreneurs, including Giovanni Agnelli.

FCA, the seventh-largest automaker in the world based on total annual vehicle sales, is an international automotive group. FCA is listed on the New York Stock Exchange under the symbol "FCAU" and on the Mercato Telematico Azionario under the symbol "FCA."
