FCA Canada: New 2020 Ram 1500 EcoDiesel Is Canada's Half-Ton Diesel Torque Leader: 480 lb.-ft. of Torque

- New Ram 1500 EcoDiesel produces highest half-ton diesel torque, achieving 480 lb.-ft., and highest available half-ton diesel towing capacity at 5,697 kg (12,560 lb)
- EcoDiesel-powered Ram Rebel offered for first time
- Ram pickups own the top spots in torque ratings with 480 lb.-ft. (light duty) and 1,000 lb.-ft. (heavy duty)
- Class-exclusive air suspension enhances fuel economy, improves ride control and off-road capability, along with entry/exit and loading, and features automatic load leveling

June 10, 2019, Windsor, Ontario - The 2020 Ram 1500 will become Canada's most powerful half-ton diesel pickup with 480 lb.-ft. of torque and most capable light-duty diesel, with towing capability up to 5,697 kg (12,560 lb). The all-new third-generation 3.0-litre EcoDiesel V-6 also is expected to lead the segment on fuel economy.

"The new Ram 1500 EcoDiesel is Canada's most powerful half-ton diesel pickup, following up on Ram's Heavy Duty torque leadership and achieving what no other manufacturer has, with up to 480 lb.-ft. of torque in a 3.0-litre engine," said Reid Bigland, Head of Ram Brand. "The all-new EcoDiesel engine and our eTorque mild-hybrid powertrain technologies deliver the highest available fuel efficiency for our Ram 1500 customers."

The 2020 Ram 1500 EcoDiesel is available in all models and configurations including a first-time offering in the Ram Rebel. The 2020 Ram 1500 EcoDiesel will go on sale in the fourth quarter of 2019. Pricing and fuel economy ratings will be announced closer to the truck's on-sale date.

The 2019 Ram 1500 Classic is also offered with the optional second-generation 3.0-litre EcoDiesel.

All-new EcoDiesel engine

The third generation of the turbocharged 3.0-litre EcoDiesel V-6 delivers increased torque and horsepower, along with superb fuel economy and minimal levels of noise, vibration and harshness (NVH) to meet the needs of Ram 1500 owners.

In the 2020 Ram 1500 the 3.0-litre EcoDiesel V-6 is rated at a best-in-class 480 lb.-ft. of torque at 1,600 rpm, a 14 per cent increase from the previous-generation EcoDiesel V-6, that peaks 400 rpm earlier. Horsepower increases 8 per cent to 260 hp at 3,600 rpm.

Several significant changes contribute to the new EcoDiesel's improved dynamic and fuel economy performance.

- A new-generation water-cooled turbocharger with variable geometry turbine (VGT) increases efficiency and responsiveness during transient conditions
- Redesigned cylinder head intake ports improve swirl and flow, increasing performance and fuel economy
- The exhaust gas recirculation system design (EGR) has been updated to a dual loop (low and high pressure) system. The added low-pressure circulation system draws gases after the diesel particulate filter, thus minimizing turbocharger energy losses; this increases fuel economy
- The compression ratio has been optimized to 16.0:1, from 16.5:1
- High pressure (29,000 psi/2,000 bar) direct injection fuel injector nozzles were redesigned to match the newly designed and optimized combustion chamber
- Lightweight aluminum alloy pistons were completely redesigned to include thinner rings and low-friction coating on the pin and side skirts to reduce losses

- NVH has been reduced by offsetting piston pin by 0.3 millimetres from the centerline - thus minimizing mechanical noises
- The lower portion of the two-piece oil sump uses a lightweight sandwiched polymer/metal material that further reduces NVH
- The dual vacuum pump system uses electric and a new mechanical low-friction pump with new blades that improve overall system efficiency

The upgrades build on the EcoDiesel V-6's previous success, whose attributes and performance made it a winner of "Wards 10 Best Engines Award" for three consecutive years (2014, 2015, 2016).

The 3.0-litre EcoDiesel V-6 uses dual overhead camshafts (DOHC) with four valves per cylinder and a 60-degree angle between the cylinder banks. The block is cast with compacted graphite iron, which provides strength to dampen vibrations but weighs less than grey cast iron. A compacted graphite iron bedplate adds rigidity to the block.

The EcoDiesel V-6 uses a forged steel crankshaft and connecting rods for strength and durability. The aluminum alloy pistons are cooled on the underside via oil jets. Heat-treated aluminum cylinder heads use individual bearing caps to reduce friction and minimize NVH. The chain-driven overhead camshafts employ roller-finger followers.

The 3.0-litre EcoDiesel V-6 is produced at the FCA Cento facility in Ferrara, Italy.

Ram 1500

The 2020 Ram 1500 is the no-compromise benchmark for durability, technology, efficiency and convenience with features never-before offered in a pickup. The Ram 1500 features up to 5,783 kg (12,750 lb) of towing capability (5.7-litre HEMI V-8) and 1,043 kg (2,300 lb) of payload. Ram's eTorque mild hybrid system delivers improved fuel efficiency in both V-6 (standard) and V-8 configurations. As the segment leader, the new Uconnect 4C with a massive 12-inch touchscreen leads the pickup world in technology, featuring split-screen capability, 360-degree camera views and exclusive content from SiriusXM with 360L. Active safety and security systems include adaptive cruise control, Forward Collision Warning, Blind-spot Monitoring and Ready Alert Braking. Class-leading ride and handling is accomplished via a class-exclusive link-coil rear suspension system with optional Active-level four-corner air suspension. The 2020 Ram 1500 also features twice the interior storage capacity versus the competition.

Unsurpassed powertrain warranty – five years/100,000 kilometre

The 2020 Ram 1500 is backed with a five-year /100,000-kilometre Powertrain Limited Warranty. The powertrain-limited warranty covers the cost of all parts and labour needed to repair a covered powertrain component – engine, transmission and drive system.

The standard three-year / 60,000-kilometre Basic Limited Warranty provides bumper-to-bumper coverage for the Ram 1500, from the body to the electrical system.

Manufacturing

The 2020 Ram 1500 EcoDiesel is built at the Sterling Heights Assembly Plant (SHAP) in Sterling Heights, Michigan.

FCA Canada

Founded as the Chrysler Corporation in 1925, FCA Canada Inc. is based in Windsor, Ontario, and celebrates its 97th anniversary in 2022. FCA Canada is a wholly owned subsidiary of FCA, a North American automaker based in Auburn Hills, Michigan and member of the Fiat Chrysler Automobiles N.V. (FCA) family of companies. FCA Canada has approximately 440 dealers that sell Chrysler, Dodge, Jeep®, Ram, FIAT and Alfa Romeo products, as well as SRT performance products. The company also distributes Mopar and Alfa Romeo parts and accessories. In addition to its assembly facilities, which produce the Chrysler Pacifica, Chrysler Pacifica Hybrid, Chrysler Voyager and Chrysler Grand Caravan (Windsor) and Chrysler 300, Dodge Charger and Dodge Challenger (Brampton), FCA Canada operates an aluminum casting plant in Etobicoke, a research and development centre in Windsor, and has sales offices and parts distribution centers throughout the country.
